Description

This bike is a base for all the other bikes. It includes a folding roof, a sink, side shelves, and a large storage cabinet.

It may be adapted to different purposes: sale of particular products, as a form of a bar, or as a tool of advertising campaigns. In order to adapt a bike to your needs, you should tell us the way it will be used, and simply choose appropriate accessories.

Gastronomic devices such as a fry top, a crepe machine, or a blender; accessories such as an advertising box, or a case instead of a carrier. At the end we select an appropriate electrical installation and a bike is ready.

Dimensions

- 1 Box (mm): 1300x800x550 h
- 2 Bike (mm): 2600x1100x2200 h
- 3 Heigh (with a folded roof) (mm): 1700 mm

Variants

- 1 Wooden
- 2 RAL painted

Strong 21" wheels

We designed strong wheels with a diameter of 68 cm which make moving around the city facile and comfortable.

Turning radius: 4 m

A turning radius was optimised so a bike can easily cross the streets. Turning limiters are responsible for safety and guarantee stability of a bike.

Firm bike frame painted at any colour

The double tube frame ensures stable driving as well as solidity of the whole construction. It's screwed to the front part of a bike so it can be disassemble easily during servicing or shipping. While placing an order, it is possible to choose a colour of the bike frame (RAL colour chart).

Waterproof fabric roof

A roof is made of waterproof Cordura fabric. It is strong and resistant to mechanical damage. In order to wash the fabric, you can easily take it off from a frame. You can choose the colour of the material, and moreover we can put your company logo on it.

Master key

You can open all the cabinets using one master key. If the key is lost, we will provide you with a new set of keys.

Hydraulic brakes with an option of parking brake

The strongest brakes available on the market guarantee safe driving. A parking brake facilitates placing a bike while working.

Side shelves

The side shelves improve appearance of a bike and provide an additional space for accessories. The shelves are set in a special way which guarantees stability of the products which stands on them.

Huge pushing handle

A huge pushing handle not only looks good but also facilitates riding on a bike. The handle is made of a round stainless steel profile and it will survive even the farthest trips.

Folding roof

A construction of a roof is made of circle profiles, and it can be folded easily. We designed strong screws to prevent from folding of a roof in an unexpected moment.

Possibility of removing of a roof

In order to facilitate transport and storage of a bike, we designed a removing roof. Simply, you need to turn some screws, and a roof is removed. Moreover, if you get bored of a colour of a roof, you can easily replace it.

Folding side covers

In order to make storage of a bike as easy as possible, we designed folding side covers. Simply, you need to raise one element and the covers are folded.

Box

Make your bike unique! You can choose from three different versions: waterproof plywood, stainless steel and RAL painted.

Stainless steel top

To increase the quality, and to improve cleanliness of work, we designed a stainless steel top which is easy to clean and resistant to mechanical damage.

Large storage cabinet

As the only company, in such a small space we managed such a large storage space. A cabinet with a dimension of 850x760x480 h which can be opened in the front part of a bike, will hold all your products and accessories. A bottom part of a storage cabinet is perforated – it is extremely important in case of bikes with gas supply.
